SUMMARY

Economics and Quantitative Methods graduate (STEM-designated) and CFA Level I candidate targeting asset management and portfolio support. Combine financial and quantitative analysis with Excel, Tableau, and Python to package client reporting, attribution, and exposure data and modernize client deliverables.

CORE SKILLS

Markets & Fixed Income: Building fixed-income fluency (fixed income, portfolio management) and Money and Banking coursework; active follower of rates and macro.

Research & Analysis: Company, sector, and funding research; financial statement analysis; valuation fundamentals through CFA Level I and coursework.

Reporting & Tools: Advanced Excel and PowerPoint, Tableau dashboards, SQL, Python, R; client reporting, performance, attribution, and exposure packaging, presentation support.

INVESTMENT EXPERIENCE

MARQUEE EQUITY

New Delhi, India

Investment Banking Fellow

Jul 2022 - Jun 2023

- Researched early and growth-stage startups across TMT, consumer goods, education, and B2B services, analyzing sector trends, funding momentum, and competitive positioning to support fundraising and investor outreach.
- Supported preparation of investor-facing materials by translating company and sector research into clear narratives for client decisions.
- Built company and sector research that informed mandate selection and deal prioritization across the team pipeline.

ANALYTICS & FINANCE EXPERIENCE

THE GLOBAL TECH EXPERIENCE

Bloomington, IN

Data Analytics Trainee

Jan 2025 - May 2025

- Built Tableau and Excel dashboards synthesizing large multi-source energy and infrastructure datasets into a clear comparative framework, supporting Intel's data-center site-selection decision across five candidate locations.
- Packaged campaign data into executive-ready, client-facing reporting and presentations, identifying three engagement drop-off points and top-performing segments that shaped client content strategy.
- Automated data cleaning, reporting, and documentation with Python and generative AI, cutting manual processing time and freeing capacity for higher-order analysis.

DLF LIMITED

Gurugram, India

Finance & Operations Intern

Aug 2023 - Oct 2023

- Built Excel reporting templates that standardized expense categorization and shortened the monthly close, reducing manual errors and reconciliation issues.
- Analyzed vendor and departmental spending across three months; findings fed a cost review credited with roughly 10% lower monthly operating costs.

NTALENTS.AI

Bangalore, India

Data Analytics Intern

Jun 2023 - Jul 2023

- Ran SQL and Python analysis across tens of thousands of records per client and built client-facing dashboards; packaged findings into client presentations, contributing to roughly 15% higher client satisfaction.

EDUCATION

INDIANA UNIVERSITY

Bloomington, IN

B.S. Economics & Quantitative Methods (STEM), Minor in Psychology

May 2026

- Relevant coursework: Money and Banking, Machine Learning for Economic Data, Computational Methods in Macroeconomics, Game Theory, Statistical Analysis, International Trade.
- CFA Level I Candidate (Feb 2026).
- London School of Economics exchange: Intermediate Macroeconomics, Introduction to Econometrics (Jul 2024 - Aug 2024).
- Principles of Cybersecurity, Finance Chair: managed a roughly \$2K per semester budget and coordinated planning for events of 60+ attendees (EY, AT&T, Accenture).
