## SUMMARY

Economics and Quantitative Methods graduate (STEM-designated) targeting analyst roles in credit ratings, structured finance, and asset management. Combines strong financial and quantitative analysis with advanced Excel, Tableau, and Python to analyze large datasets and produce clear, decision-ready research.

## CORE SKILLS

**Research & Analysis:** Company, sector, and credit research; financial statement analysis; valuation and fixed-income fundamentals through coursework.

**Reporting & Tools:** Advanced Excel, Word, and PowerPoint, Tableau dashboards, SQL, Python, R, VBA (basics); multi-source data analysis, client reporting, and presentation support.

## INVESTMENT EXPERIENCE

### MARQUEE EQUITY

New Delhi, India

*Investment Research Fellow*

Jul 2022 - Jun 2023

- Researched early and growth-stage companies across TMT, consumer goods, education, and B2B services, analyzing sector trends, funding momentum, and competitive positioning to support fundraising and investor outreach.
- Supported preparation of investor-facing materials by translating company and sector research into clear narratives for client decisions.
- Built company and sector research that informed mandate selection and deal prioritization across the team pipeline.

## ANALYTICS & FINANCE EXPERIENCE

### THE GLOBAL TECH EXPERIENCE

Bloomington, IN

*Data Analytics Trainee*

Jan 2025 - May 2025

- Built Tableau and Excel dashboards synthesizing large multi-source energy and infrastructure datasets into a clear comparative framework, supporting Intel's data-center site-selection decision across five candidate locations.
- Packaged campaign data into executive-ready, client-facing reporting and presentations, identifying three engagement drop-off points and top-performing segments that shaped client content strategy.
- Automated data cleaning, reporting, and documentation with Python, cutting manual processing time and freeing capacity for higher-order analysis.

### DLF LIMITED

Gurugram, India

*Finance & Operations Intern*

Aug 2023 - Nov 2023

- Built Excel reporting templates that standardized expense categorization and shortened the monthly close, reducing manual errors and reconciliation issues.
- Analyzed vendor and departmental spending across three months; findings fed a cost review credited with roughly 10% lower monthly operating costs.

### NTALENTS.AI

Bangalore, India

*Data Analyst Intern*

Jun 2023 - Jul 2023

- Ran SQL and Python analysis across tens of thousands of records per client and built client-facing dashboards; packaged findings into client presentations, contributing to roughly 15% higher client satisfaction.
- Performed exploratory analysis on structured and unstructured recruitment datasets to surface patterns and opportunities, translating findings into clear visual insights for stakeholders.

## EDUCATION

### INDIANA UNIVERSITY

Bloomington, IN

*B.S. Economics & Quantitative Methods (STEM), Minor in Psychology*

May 2026

- Coursework: Money and Banking, Machine Learning for Economic Data, Computational Methods in Macroeconomics, Game Theory, Statistical Analysis, International Trade.
- London School of Economics exchange: Intermediate Macroeconomics, Introduction to Econometrics (Jul 2024 - Aug 2024).
- Honors: Executive Dean's List (College of Arts + Sciences).
- Project: Python simulation modeling UBI's labor-supply effects across elasticity levels, with sensitivity analysis.
- Finance Chair, Principles of Cybersecurity: managed a roughly \$2K per semester budget and coordinated planning for events of 60+ attendees (EY, AT&T, Accenture).

## ADDITIONAL

**Languages:** English (fluent), Hindi (native), Punjabi (native), Spanish (basic).

**Interests:** Markets and macro, football, philosophy, fitness.
